

## **Introduction to Stock**

In this video you will learn about recording stock information in the Enterprise Livestock pack.

You add animals to FarmIQ by setting up mobs. You can also track what paddocks the stock is in.

On the Enterprise pack you can record information against EID tags.

Using EID in FarmIQ means you can track and report the performance of individual animals.

FarmIQ tracks stock numbers and maintains a stock reconciliation.

To view the stock reconciliation, click **Stock**, **Add remove stock** then **Stock Reconciliation**
