

Welcome to the map

In this video, you will learn how to set up your farm map.

Click the map icon to return to the map from anywhere in FarmIQ.

You can zoom in and out of your map by clicking the plus and minus buttons in the top-right corner of your map.

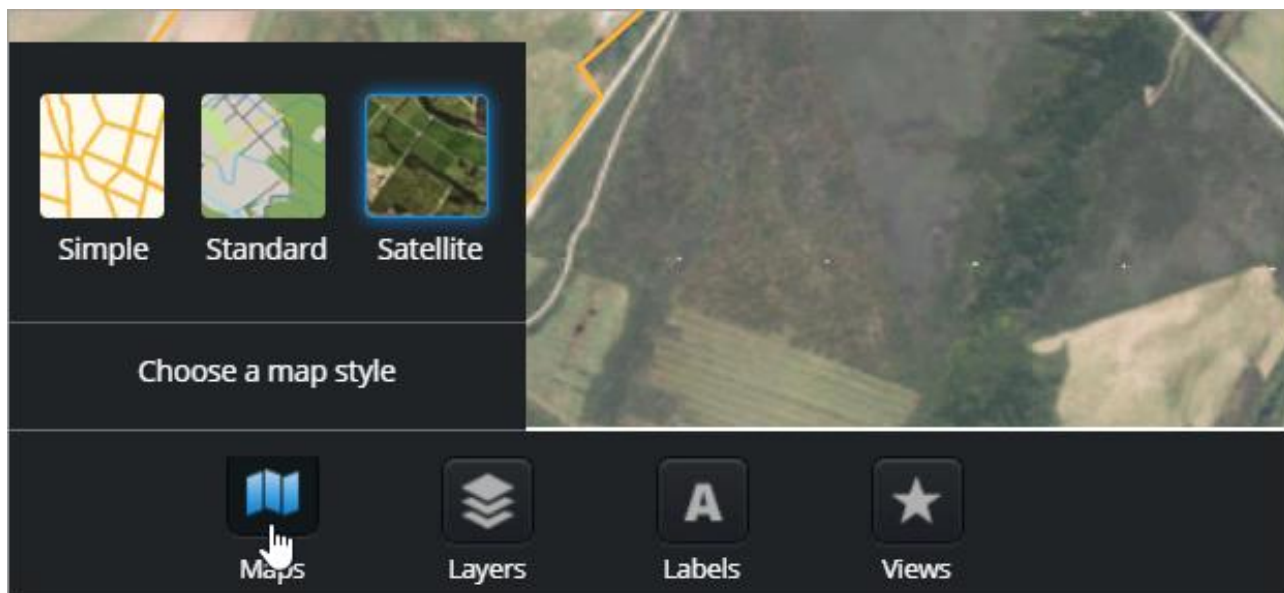

Rotate the map by holding down the shift key and clicking, holding and dragging the mouse.

If you have a touch pad, hold the Shift key and left-hand touchpad button down, then drag your finger around the touchpad.

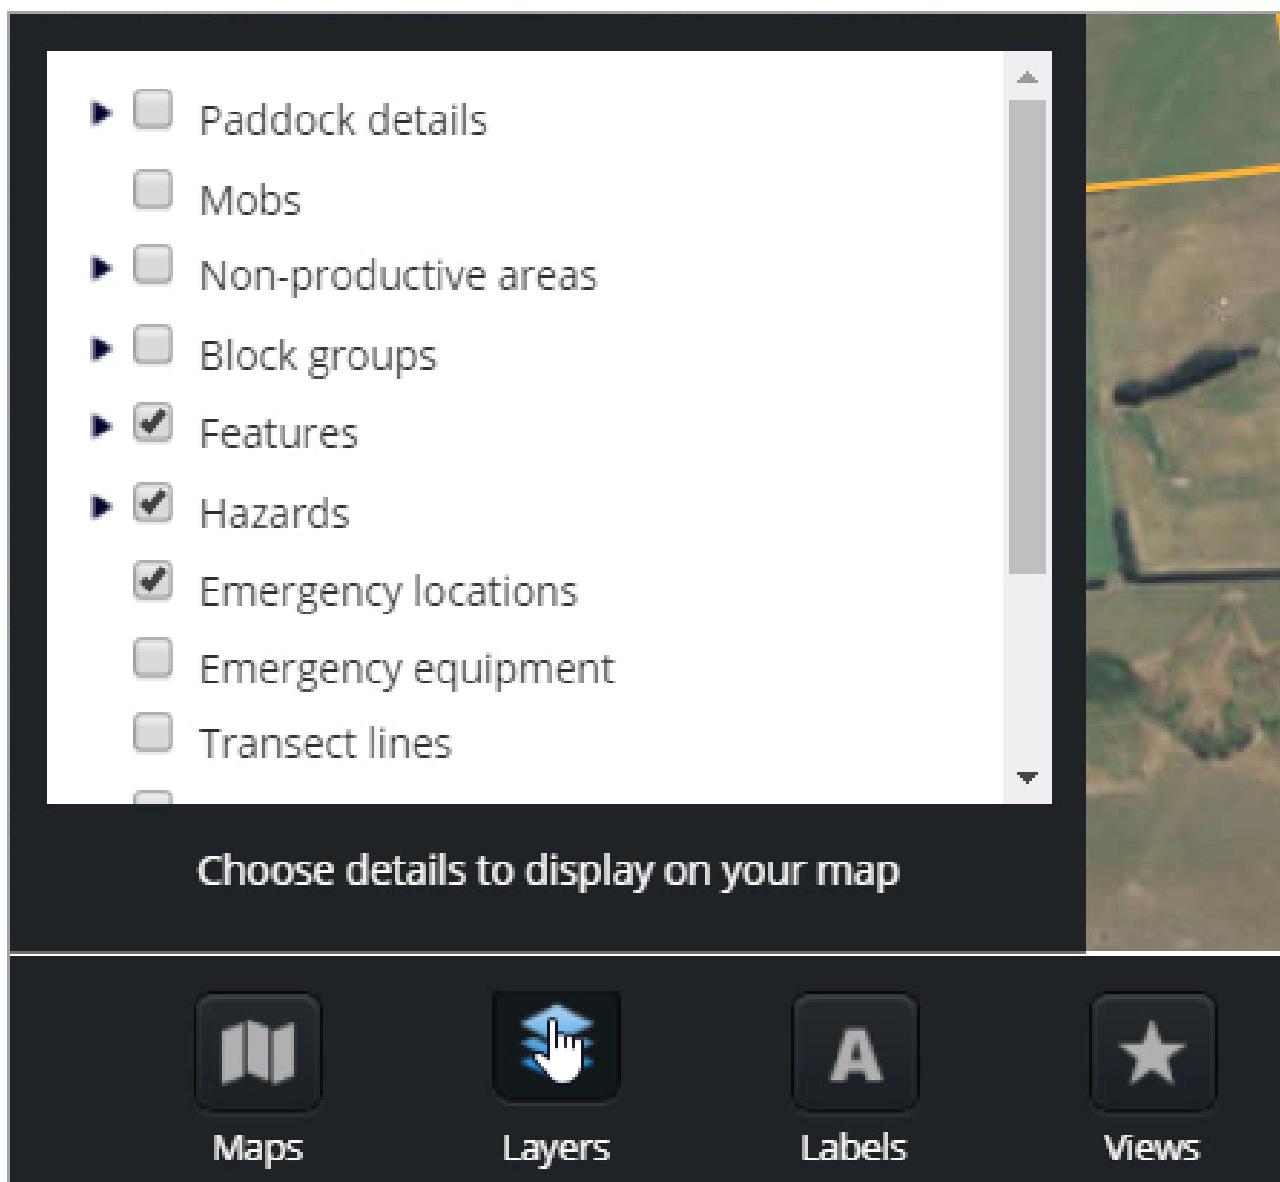

To reset, you can click **N** to point North and click **C** to center the map over you farm.

At the bottom of the screen are tools and options for managing your view of the farm map.

You can change the background. Select **Simple**, **Standard** or **Satellite**. If you have a slow internet connection, select simple or standard. The map will load much faster.

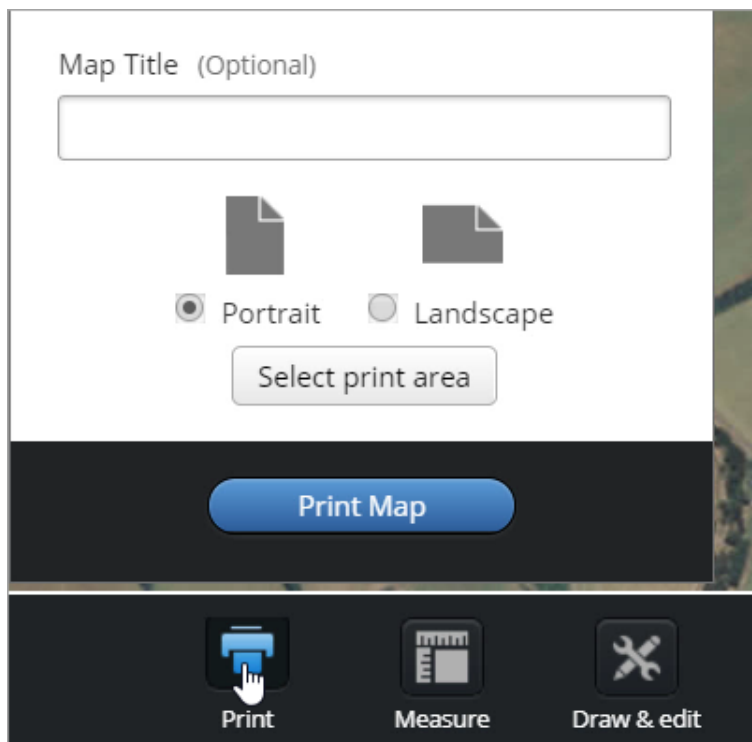

Select additional layers to show on the map such as hazards and features...

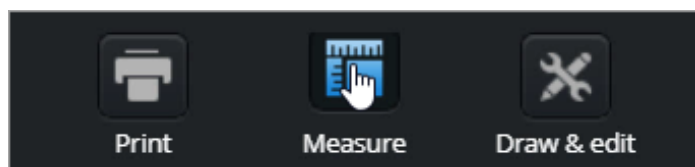

...and turn labels on and off for the layers shown on your map.

To save the current map view, including zoom, position, rotation, layers and labels, click **Views**.

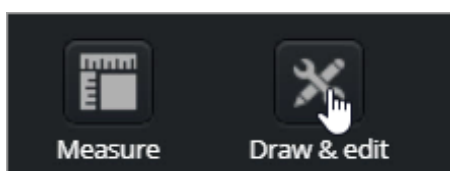

You can print the current view of layers and labels for your farm. Click **Print**, select **Portrait** or **landscape** then click **Print Map**.

A preview of the map appears in a pop-up window. If a preview does not appear you need to allow pop-ups.

You can use the measure tool to work out distances and areas between points on the map.

To add or edit; **paddocks, blocks, features** and **hazards**, click **draw and edit**. Click again to close.

This video explained some of the ways to set up your Farm^{IQ} map.
